

## Electric Pellet Mill: ZLSP D-Type 400B Pellet Mill

If you are decided to make your own wood pellets at home, then you need to find good pellet mills for sale. In fact there are a lot of similar pellet mill suppliers on the internet, but how to recognize the good ones? Then most important factor is neither the electrical system nor the material it is made from, but the compression rate. The core process of the wood pellet manufacturing equipment is the compression stage. If the rate is not proper for your materials, you will not receive wonderful pelleting results, thus your money is wasted. Based on years of experience on making pellet mills, our machines have the most accurate compression rate for almost all biomass materials that you can find.

Model: ZLSP D-Type 400B

Capacity: 200-250KG/H

Power: 22KW

Net Weight:410 KG

Outside Dimension: 1200\*500\*1070 MM

Specification of Pellet Mills:

- Pellet mills invest the low cost, and get the quicker profit, they are better for dealing with the life waste, and make the pellets as the fuel at home.
- The materials are pressed by the 3 rollers at one time, so the pressed area increases 1 more roller, so that improve the capacity.
- The three rollers are designed cone-shaped and slanted to reduce the friction between the roller and the plate. Therefore the consumption is lower.

Port: Tianjin

Payment Terms:L/C,T/T

Supply Ability: 30 Set/Sets per Month

Package: wood case

Delivery Time: 20 days
