

Rotating Roller Pellet Mill: ZLSP R-Type 400B Pellet Mill

Model: ZLSP R-Type 400B

Capacity: 300-350KG/H

Power: 30KW

Net Weight: 550KG

Outside Dimension: 1470*600*1150 MM

Pellet Mill Features:

- The gears of the gearbox are made of high quality alloy steel. After case-hardening, carburizing and grinding processes, the gears obtained advantages like smooth transmission, low noise, high bearing capacity, low temperature rise and long useful life.
- The mainshaft has a heavy-duty thrust bearing which has a long useful life and can carry great axial force.
- It applies long-diameter rollers, which makes the machine have a large output, high molding rate, uniform size and high density.
- Both the roller and the flat die have passed wear-resistant process. The two side of the flat die is exchangeable, which extended the useful life of the machine.
- In order to prevent dust and improve the working environment, all the bears applied leakproof structure. And this also extended the service life of the bearings.
- Our pellet mills can produce 6-12mm pellets, you can choose according to your need.

Port: Tianjin

Payment Terms: L/C, T/T

Supply Ability: 30 Set/Sets per Month

Package: wood case

Delivery Time: 20 days
